I seem to remember someone recently posting a request for a schematic for a 6L6 xmitter. While perusing the July 1938 issue of Radio News this weekend, I came across an article with a design for a nice 6L6 MOPA 160M xmitter with choke-coupled plate modulation. The article includes coil winding info. The tube lineup is (3) 6L6, (1) 6F5, (1) 6C5, and (1) 83. I'll gladly send a photocopy to anyone who sends a SASE (32 cents should do it).

carefully, too...)

If you still have this, and it is as good as you say, I will take it
plus the UPS ground. Please let me know . tnx...

Many think this R-390A/URR is the best all-around receiver ever made. This
one is a late model (one of the last production runs), made by EAC.
It is big, heavy, uses tubes. Quality look, feel, and performance. 110 or
220 VAC. Even has ovens for oscillator stability.

Upper tuning limit 31.999 MHz

Has 6 IF selectivity filters (0.1, 1, 2, 4, 8 and 16 KHz).

Also 2 audio filter positions (Wide and Narrow).

2 meters (Line Level, Carrier Level).

Total of 17 knobs (Line Meter sw, Line Gain ctl, Ant Trim ctl, AGC sw,
Limiter ctl, Audio Response sw, Break-In sw, Bandwidth sw, BFO Pitch ctl,
Function sw, BFO sw, Dial Lock ctl, Zero Adj ctl, Local Gain ctl, RF Gain
ctl, Megacycle Change ctl, Kilocycle Change ctl)

Rack mount style (no cabinet, but has all covers). 19 in wide, 10.5 high,
about 15 deep.

No speaker. No manual (Fair radio sales has manual).

\$300 plus UPS if shipped.

W4UKU

Hi Gang,

Thanks,

KIM
